Re:	Stewart Park paving award recommendation

The Town's 2021 GO Bond included a budget of $116,000 for repaving of the Stewart Park parking lot and adding an accessible route from the parking lot to the shelter. This project was quoted out with the help from the Town's engineer at SEH.

Enclosed is a memo SEH summarizing the quotes and recommending the award to Rieth-Riley at a total cost of $107,142.37.

With many construction projects, the ground conditions found after removing the existing asphalt may include areas that need additional work and could seek a change order. To be prepared for this I am recommending award of this project I the amount quoted by Rieth-Riley but am also seeking to also give the Director the ability to authorize change orders up to the budgeted figure of $116,000 should that be necessary.
