Re: Centennial Park Fire Sprinkler System

The fire sprinkler systems at the Centennial Park Clubhouse and the maintenance building have not been professionally inspected since 2018. Rask Fire Safety was doing the inspections and testing prior to Rod Potts illness. The inspections are required by local code. We received quotes from Rask and Ryan Fire Protection. Ryan Fire Protection currently services Town Hall and the Public Works buildings.

Ryan Fire Protection Inc. \$2,508.00/year for five years

Rask Fire Life Safety LLC \$2,059.00/year for five years

It is recommended that the Park Board approve the five-year agreement with Rask, they are not only less expensive but have been servicing the systems since the facility was built and are familiar with both buildings.
