Re: Per Mar Security Services Price Increase

Per Mar Security Services provides security to the pump stations, alerting the Water Department when the alarm is activated. The current system operates on 3G/4G modems at the water facilities. An upgrade is required by Per Mar Security Services to 5G. The current monthly rate is \$141.80. This upgrade will raise the monthly fee \$15 per month for the Superior elevated tank and the 8103 Calumet tank. The new monthly rate will be \$156.80 per month.

Per Mar Security Services will maintain continuous and uninterrupted protection of the alarm system's cellular communicator and it will be replaced with 5G capacity. Free batteries will also be provided as needed and an annual inspection of the system will be performed upon request at no charge.

Recommendation: By motion and voice vote, approve the price increase by Per Mar Security Services for 5G service to the pump station on Superior and at 8103 Calumet for a monthly rate of \$156.80.
