RE: 2023 Update to ADA Transition Plan

Background

In 2012, the Town Council adopted an ADA Transition Plan outlining steps the Town would take to ensure that Town facilities, services, programs, and events will be accessible to persons with disabilities. As a recipient of federal funding, the Town is required to maintain this transition plan and update it periodically.

Methodology

The initial plan was adopted in 2012 and revised in 2018. The version presented tonight is the most current version and includes a five-year plan for updating sidewalks and curb ramps within Town-owned public rights-of-way. Our intention is to update the plan annually, documenting the progress made each year toward improving our public infrastructure.

Recommendation

By motion and voice vote, approve the 2023 ADA Transition Plan as presented.
