

To: Dustin Anderson – Town Manager
From: Stephen Gunty – Director of Public Works
Meeting: February 20, 2023
Re: Purchase of a 2023 Attenuator Trailer with lighted Arrow Board sign

Background

The purchase is on the five-year capital improvement plan for 2023. This is a new piece of traffic safety equipment for Munster Public Works Street Division consisting of a towable trailer with an energy absorbing crumple zone built into the frame that will absorb the impact of a crash with minimal to zero damage to the towing vehicle. More importantly, it will provide a buffer zone of life safety protection for our street crews working in or close to busy traffic on projects such as: street paving/repair, tree cutting, holiday decoration installation and watermain breaks.

Methodology

Highway Safety Specialists – Ft. Wayne, IN

TTMA-200 Gregory Attenuator with light package	\$22,000.00
--	-------------

Delwa Enterprises – Knox, IN

Scorpion II towable Attenuator	\$29,824.06
--------------------------------	-------------

Delwa Enterprises – Knox, IN

Gregory TTMA-200 Mash TL-3 Attenuator	\$31,320.40
---------------------------------------	-------------

Striping Service and Supply – Grand Prairie, TX

TL-3 Scorpion II trailer Attenuator	\$40,032.00
-------------------------------------	-------------

Budget Note

The purchase will be funded from the 2022 G.O. Bond proceeds 4413-9152122-64440.

Recommendation

By motion and voice vote, approve purchase from Highway Safety Specialists a new 2023 Gregory TTMA-200 Attenuator with light package for \$22,000.
