PLAN COMMISSION STAFF REPORT

To:	Members of the Plan Commission
From:	Rachel Christenson, AICP, On-call Planner for the Town of Munster
Meeting Date:	June 13, 2023
Agenda Item:	PC Docket No. 23-010
Application:	**Zoning Amendment – Planned Unit Development Amendment**
Hearing:	**PUBLIC HEARING**
Summary:	Maple Leaf Crossing LLC requesting approval of an amendment to the Maple Leaf Crossing Planned Unit Development to add parking spaces and modify Lots 2-7 and Outlots A and B.

Applicant:	Maple Leaf Crossing LLC
Property Address:	9410-9470 Calumet Avenue
Current Zoning:	Planned Unit Development
Adjacent Zoning:	North: SD-M South: SD-M/PUD East: CD-4.A West: SD-M
Action Requested:	Approval of PUD Amendment Request
Additional Actions Requested:	**Findings of Fact** Town Council Approval
Staff Recommendation:	Approve with conditions.

Attachments:

2. Maple Leaf Crossing Site Plan prepared by Torrenga Engineering dated 05.19.2023
3. Maple Leaf Crossing Storm Sewers & Grading Plan prepared by Torrenga Engineering dated 05.19.2023
4. Maple Leaf Crossing Drainage Calculations prepared by Torrenga Engineering dated 05.03.2023
5. Maple Leaf Crossing Photometric Site Plan prepared by KSA Lighting & Controls dated 05.17.2023
6. Maple Leaf Crossing Landscape Plan prepared by Planned Environment Associates dated 05.17.2023
7. Ordinance 1803 and Ordinance 1878

BACKGROUND

Figure 1: Maple Leaf Crossing PUD outlined in red.

Maple Leaf Crossing LLC has applied for an amendment to the Maple Leaf Crossing Planned Unit Development to modify the adopted development standards and site plans to add parking spaces and modify Lots 2-7 and Outlots A and B.

The PUD is currently governed by Ordinance 1803 which established the Maple Leaf Crossing Planned Unit Development at 9352-9482 Calumet Avenue, an approximately 6-acre parcel located at the northeast quadrant of the intersection of Calumet Avenue and the CN Railroad tracks. The ordinance was adopted in July 2020 by the Munster Town Council, on the recommendation of the Plan Commission. The approved PUD includes site engineering plans, a set of development standards, and a site-wide landscaping plan, which are attached to this memo.

An ordinance amending the Maple Leaf Crossing Planned Unit Development (Ordinance 1878) was adopted amendment to this PUD was adopted by the Munster Town Council in December of 2022, on recommendation of the Plan Commission. This amendment provided for the development of Lot 7 as a 6400 square foot cigar bar and restaurant. The revised engineering plans are attached to this memo.

The approved site plan (including the 2022 amendment) includes the following:

- Lot 1: A four-story, approximately 60,000 square foot professional office building
- Lot 2: A four-story, approximately 71,000 square foot Hyatt Place hotel
- Lot 3: A 4,623 square foot restaurant
- Lot 4: An area designated for at least 10 shipping container retail spaces
- Lots 5 and 6: Two 7,774 square foot, single-story office buildings
- Lot 7: A 6,400 square foot cigar bar and restaurant
- Internal parking spaces and a new public road, Maple Leaf Boulevard, along the north edge of the site that provides access to Calumet Avenue

The developers are seeking an amendment to the Maple Leaf Crossing PUD development standards and the approved development plan to add parking spaces and modify Lots 2 – 7 and Outlots A and B.

SITE PLAN MODIFICATIONS

Here is a summary chart of the proposed changes by the petitioner:

Lot Number	Proposed
1	• No changes proposed.
2	• Slight reduction in the square footage of the lot. • Modifications to the site plan.
3	• Increase in the size of Lot 3. • Modifications to the site plan. • Increase the size of the restaurant to 4,765 square feet.
4	• Decrease in the size of Lot 4.
5	• Decrease in the size of the office building to 7,054 square feet. • Slight reduction in the square footage of the lot.
6	• Modification in the shape of Lot 6. • Decrease in the size of the office building to 7,182 square feet.
7	• Modification to the shape of Lot 7.
Parking	• An increase in the size of Outlot A due to property line modifications to Lot 2. • An increase in the size of Outlot B due to property line modifications to Lot 5. • Changes to the site plan, including addition of parking spaces, removal of bike path in Outlot A, addition of a trash enclosure in Outlot B, and modifications to landscape plan. • An increase in the number of parking spaces in Outlots A and B from 351 to 385.

The proposed modifications to Lots 2 – 7 and Outlots A and B require modifications in the landscape plan, lighting plan, and drainage plan.

On Lot 7, the proposed plans indicate a change in the building square footage of the cigar bar and restaurant. An email dated 5/31/2023 from Jay Lieser indicates that the square footage on the drawings indicates the square footage of the first floor of the structure. This is not consistent with the way other structures are labeled on the site plan, as the square footage indicated on the other structures is the total square footage of the structure, not just the first-floor square footage.

ANALYSIS

DEVELOPMENT PLAN MODIFICATIONS

The proposed PUD amendment is seeking to supersede the previously adopted Development Plan for the Maple Leaf Crossing Planned Unit Development (Exhibit A of Ordinance 1803 and Exhibit D of Ordinance 1879).

Code/Ordinance	Section	Standard	Proposed	Meets Code
Ord. 1803	6.	**Off-Street Parking Facilities** Off-street parking shall include approximately 358 parking spaces as set forth in the Approved Development Plan.	Requested number of parking spaces has increased to 385.	Needs Plan Commission Determination*
	7.	**Lot Coverage** Green space shall exceed 7.5% of the total area as set forth in the Approved Development Plan	The proposed greenspace exceeds 7.5% of the total area (13.62%, or 0.96 acres out of 7.049 acres).	Yes
	8.	**Pedestrian and Bicycle Access** Sidewalks and bicycle paths shall be located within and upon Maple Leaf Crossing as set forth in the Approved Development Plan	The bicycle path through the Maple Leaf Crossing PUD has been removed. A bicycle path remains in the Maple Leaf Boulevard right-of-way.	Needs Plan Commission Determination
	V.	**Landscape Design Criteria** Landscaping for Maple Leaf Crossing shall generally be in accordance with the Landscaping Plan attached hereto as Exhibit C and incorporated herein.	Landscaping has been decreased to accommodate additional hardscape for parking.	Needs Plan Commission Determination**

*Parking

The original 358 parking spaces within the Maple Leaf Crossing PUD were intended to be shared among all users. At the time of approval of the PUD, a parking study was submitted which calculated that 350 total shared spaces were required for the development.

A revised study was provided in connection with the PUD amendment to permit the cigar bar. The study indicated that 52 spaces (12 additional) would be required for the proposed cigar bar and

restaurant. The study also reduced the number of spaces required for the hotel from 86 to 75 and the number of spaces required for the proposed restaurant from 56 to 32. With these modifications, the number of parking spaces required for the entire development was calculated to be 364. An additional analysis based on anticipated weekday peak parking demand by time of day indicates that the largest overlap between users occurs between 12:00 PM and 2:00 PM during which 295 spaces would be required. Based on this analysis, staff had determined the 358 spaces within the Maple Leaf Crossing PUD were sufficient. The site plan that was approved as part of the amendment shows 352 parking spaces, six spaces less that the number indicated in the Developmental Standards in Ordinance 1803. The proposed Site Development Plan indicates that parking will increase by 9.4% to from 352 parking spaces to 385 parking spaces.

**Landscaping

The proposed changes to the landscaping are mostly occurring in the northwest corner of the site. The first and second images below show the approved landscaping plan with areas with proposed changes highlighted in red. The third image below shows the proposed landscaping plan for the northwest corner.

STAFF RECOMMENDATION – PUD DEVELOPMENT PLAN

Staff understands that the petitioner's goal is to make better use of the site by removing the bicycle path and repurposing that area for additional parking spaces. Bicycle connectivity is still available to the Maple Leaf Crossing with the proposed bicycle path indicated along Maple Leaf Boulevard and Calumet Avenue, so staff finds it appropriate for the site to be modified to remove the bicycle path that cuts through Outlot A.

However, staff is concerned with the increase in hardscape and the decrease in landscaped areas in the petitioner's proposed plans. Since the petitioner has not provided new evidence or data that additional parking spaces are needed for the approved uses at Maple Leaf Crossing, the need to replace landscaping with parking spaces is not clear. According to the Munster Zoning Ordinance, landscaping for parking lots should follow Section 26-6.405.O.1.h.vii.I. Key parts of this section of the code include the following:

> 1) Parking Areas and Parking Lots shall contain at least one landscape island for every ten (10) parking spaces. Parking Lots with more than one landscape island shall have such islands distributed throughout the Parking Lot.

5) Rows of parking fronting on drive aisles including alleys shall be provided with a minimum five feet (5') (excluding curbs) landscaped buffer.

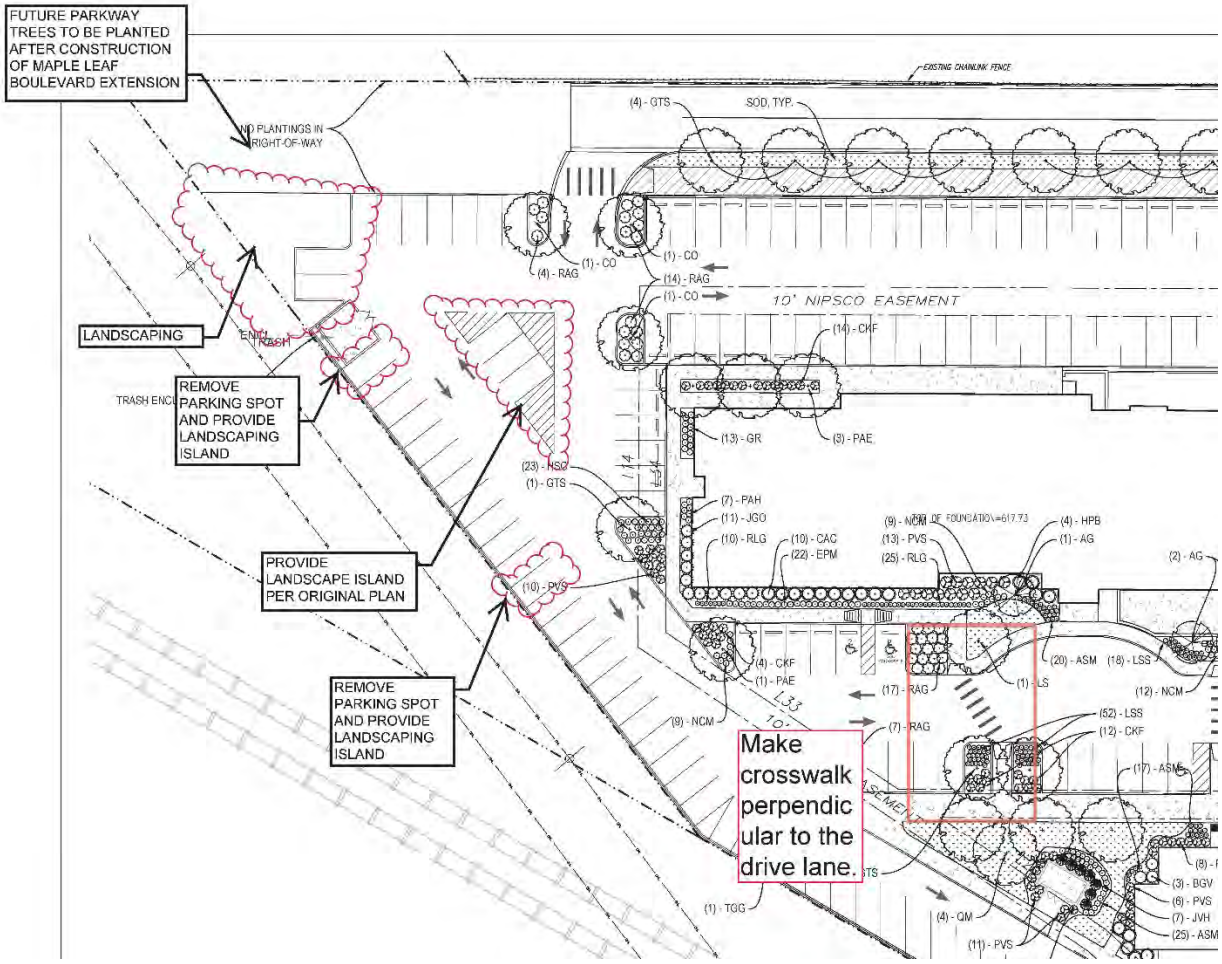
7) For every 2,000 square feet of Parking Area or Parking Lot, at least one Tree shall be installed or preserved within the Parking Area or Parking Lot except to the extent that Trees outside of the Lot containing the Parking Area or Parking Lot are allowed to satisfy this requirement as set forth below.

With these standards in mind, staff has proposed the following modifications to the landscape plan in order to be closer to compliance with the Zoning Ordinance:

- A commitment to plant future parkway trees after construction of the Maple Leaf Boulevard Extension in the right-of-way labeled "No Plantings in Right-of-Way."
- The removal of 3 proposed parking spaces to be replaced with landscaping in the far northwest corner of the site.
- The removal of 1 parking space southeast of the trash enclosure to be replaced with a landscape island in the northwest corner of the site.
- The removal of 3 parking spaces just west of the NIPSCO easement in the northwest corner of the site to be replaced with a landscape island per approved development plan (see Section 26-6.405.O.1.h.vii.I.5).
- The removal of 1 parking space west of the NIPSCO easement in the northwest corner of the site to be replaced with a landscape island (see Section 26-6.405.O.1.h.vii.I.1).

With these modifications, the proposed parking of the site would be decreased by eight (8) spaces, for a total of 377 parking spaces, which is still a 7.1% increase in parking from the approved development plan per Ordinance 1879. See image on next page for more details.

Staff also recommends the crosswalk in Outlot A between Lot 2 (Hyatt) and Lot 7 (cigar bar and restaurant) be redesigned to be perpendicular with the drive lane. Crosswalks that are perpendicular to cross the street (or drive lane in this case) are shorter and help to move pedestrians through a street or drive lane more quickly. See image on next page for more details.



Staff recommends that on the Development Plan, the square footage of the structure proposed for Lot 7 to be updated to reflect the total square footage of the structure (6,400 square feet), rather than the square footage of the first floor of the structure (4,175 square feet). The square footage of the other structures on the site are labeled by total square footage of the structure, so this change will ensure the information displayed on the plan is consistent between structures.

STAFF RECOMMENDATION – PUD DEVELOPMENTAL STANDARDS

Staff is also recommending the language of the PUD Developmental Standards to be updated for clarity and consistency. The following text amendment is proposed to the adopted Developmental Standards for the Maple Leaf Crossing Development:

Code/Ordinance	Section	Adopted Language	Proposed Language	Purpose of Change
Ord. 1803	1. A.	Development of Lot 7 as 6400 square foot cigar bar and restaurant in accordance with Exhibit D.	Development of Lot 7 as a cigar bar and restaurant in accordance with the approved development plan.	Keep the square footage of the structure out of the Developmental Standards but indicate the square footage in the approved Development Plan. Removes potential for conflict between the two documents.
Ord. 1803	6.	Off-street parking shall include approximately 358 parking spaces.	Off-street parking shall include no more than 377 parking spaces.	Removal of the word "approximately" clarifies the maximum number of parking spaces allowed, and if a reduction in parking is requested in the future, only the Development Plan will need amended, not the Developmental Standards.

MOTION

The Plan Commission may wish to consider the following motion:

Motion to recommend approval of PC Docket No. 23-010 to consider an amendment to the Maple Leaf Crossing Planned Unit Development to add parking spaces and modify Lots 2-7 and Outlots A and B, with the following conditions:

- *A commitment to plant future parkway trees per Munster Zoning Ordinance after construction of the Maple Leaf Boulevard Extension in the right-of-way labeled "No Plantings in Right-of-Way."*
- *Modifications to the parking areas on the Development Plan that reflect no more than 377 parking spaces in Outlots A and B. These modifications include the following:*
    - *The removal of 3 proposed parking spaces to be replaced with landscaping in the far northwest corner of the site.*
    - *The removal of 1 parking space southeast of the trash enclosure to be replaced with a landscape island in the northwest corner of the site.*
    - *The removal of 3 parking spaces just west of the NIPSCO easement in the northwest corner of the site to be replaced with a landscape island as originally approved.*
    - *The removal of 1 parking space west of the NIPSCO easement in the northwest corner of the site to be replaced with a landscape island.*
- *A modification to the Development Plan to show the crosswalk in Outlot A between Lot 2 and Lot 7 to be redesigned to be perpendicular to the drive lane.*
- *A modification to the Development Plan to show the square footage of Lot 7 to be updated to the total square footage of the structure (6,400 SF) to be consistent with the square footage labeling of other structures on the Development Plan.*

- *A modification of the PUD Developmental Standards with the following language:*
    - *Section 1.A shall be amended to read "*Development of Lot 7 as a cigar bar and restaurant in accordance with the approved development plan."
    - *Section 6 shall be amended to read "Off-street parking shall include no more than 377 parking spaces."*

May 3, 2023

Maple Leaf Crossing is a proposed Planned Unit Development consisting of a Hotel, three Office Buildings, one Restaurant, one Pub and a series of Railroad Container Construction design modules. The site was formerly the Munster Business Complex. The entire site has been demolished and currently consists of broken asphalt and stone. There was a significant amount of infrastructure onsite that cannot be utilized to service the new buildings. The infrastructure that cannot be reused will be removed with new infrastructure installed to service all buildings, roadways, etc. Along the northern side of the proposed development, the Pepsi Bottling Company has agreed to utilize a Public Roadway that will be installed with the development for their entrance onto Calumet Avenue. This new intersection will be controlled by traffic signals and make the entrance onto Calumet Avenue much safer and less intrusive for the general public. Private ingress-egress easements within the development will direct all interior traffic throughout the site. A new 10 foot wide bike path will be installed within the Public right of way and also a second path will be directed towards the middle of the development to promote pedestrian access. Sidewalks within the development have been widened with expanses of green area. Handicap access will be provided at all intersections. The entire site has been designed to provide the Town of Munster with a pedestrian friendly area for business and entertainment.

Drainage Areas:

Drainage Area: 307,066 = 7.05 Ac. of which 6.07 Ac. is the old Munster Business Complex (MBC) and 0.98 Ac. is the additional property acquired from the Town of Munster (TOM).

The eastern portion of the property (MBC) is 6.07 acres in size. The Munster Business Complex had an approximated runoff coefficient equal to the following:

Runoff Coefficient, C_e – Existing:

Total Existing Drainage Area = 264,409 SF = 6.07 Ac.

Impervious Area	: 262,142 SF	@ C = 0.90
Pervious Area	: 2,267 SF	@ C = 0.45

$$C_e = \frac{(262{,}142 \times 0.90) + (2{,}267 \times 0.45)}{264{,}409} = 0.896$$

C_e =0.90

Note: C_e is the coefficient of runoff for the existing site

This area drained directly into the Town of Munster storm sewer system undetained.

The proposed development requiring detention (TOM) has a coefficient of runoff equal to:

Runoff Coefficient, C_d – Developed:

Total Design Drainage Area = 42,689 SF = 0.98 Ac.

Impervious Area	: 38,304SF	@ C = 0.90
Pervious Area	: 4,385SF	@ C = 0.45

$$C_d = \frac{(38{,}304 \times 0.90) + (4{,}385 \times 0.45)}{42{,}689} = 0.85$$

C_d =0.85

Note: C_d is the coefficient of runoff for the developed site

Required detention (TOM) = 0.19 ac-ft (see spread sheet)

Estimated Water and Wastewater Demand:

All water estimated flows are taken from 327 Indiana Administration Code 3-6-11.

Domestic water usage:

Hotel – 100 gpd per room * 105 rooms = 10,500 gpd

North Office Building – 20 gpd per employee
4 units per floor * 4 floors * 8 employees per unit
20*16*8 = 2,560 gpd

South Office Building – 20 gpd per employee
20 employees * 2 buildings * 20 gpd = 800 gpd

Restaurant – Food service not open 24 hours per day – 50 gpd per seat
50 seats * 50 = 2,500 gpd

Pub – 10 gpd per seat
40 seats * 10 = 400 gpd

Container Shopping District – 10 gpd per customer
200 customers * 10 = 2,000 gpd

Total = 18,760 gpd

Wastewater usage:

Hotel 100 gpd per room * 105 rooms = 10,500 gpd

North Office Building 0.10 gpd / sf = 61,500 sf * 0.1 = 6,150 gpd

South Office Building 0.10 gpd/ sf = 15,200 sf * 0.1 = 1,520 gpd

Restaurant 50 gpd / seat = 50 * 50 = 2,500 gpd

Pub 35 gpd / seat – 35 * 40 = 1,400 gpd

Container Shopping District 10 gpd per customer
200 customers * 10 = 2,000 gpd
Total = 24,070 gpd

RECHARGER 330XLHD

Recharger 330XLHD Chamber Specifications

Height	30.5	inches
Width	52.0	inches
Length	8.50	feet
Installed Length	7.00	feet
Bare Chamber Volume	52.21	cu. feet
Installed Chamber Volume	99.56	cu. feet

Breakdown of Storage Provided by Recharger 330XLHD Stormwater System

Within Chambers	4,221.79	cu. feet
Within Feed Connectors	-	cu. feet
Within Stone	4,340.28	cu. feet
Total Storage Provided	**8,562.1**	**cu. feet**
Total Storage Required	8276.00	cu. feet

Materials List

Recharger 330XLHD

Total Number of Chambers Required	**80**	**pieces**
Separator Row Chambers	20	pieces
Starter Chambers	4	pieces
Intermediate Chambers	72	pieces
End Chambers	4	pieces
HVLV FC-24 Feed Connectors	0	pieces
CULTEC No. 410 Non-Woven Geotextile	1061	sq. yards
CULTEC No. 4800 Woven Geotextile	142	feet
Stone	402	cu. yards

Separator Row Qty Included in Total

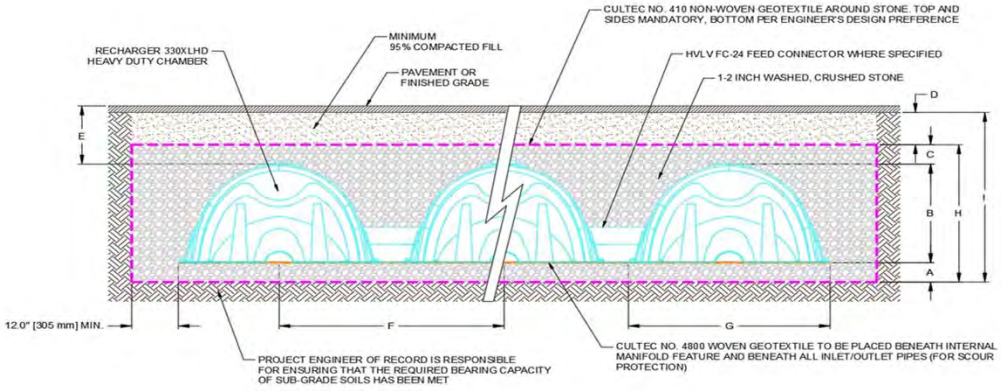
Based on External Pipe Manifold

Bed Detail

Bed detail for reference only. Not project specific. Not to scale.

Bed Layout Information

Number of Rows Wide	4	pieces
Number of Chambers Long	20	pieces
Chamber Row Width	18.83	feet
Chamber Row Length	141.50	feet
Bed Width	20.83	feet
Bed Length	143.50	feet
Bed Area Required	2989.58	sq. feet
Length of Separator Row	141.50	feet



Conceptual graphic only. Not job specific.

Cross Section Table Reference

A	Depth of Stone Base	24.0	inches
B	Chamber Height	30.5	inches
C	Depth of Stone Above Units	6.0	inches
D	Depth of 95% Compacted Fill	10.0	inches
E	Max. Depth Allowed Above the Chamber	12.00	feet
F	Chamber Width	52.0	inches
G	Center to Center Spacing	4.83	feet
H	Effective Depth	5.04	feet
I	Bed Depth	5.88	feet

Specifications

Fixture

The fixture shall be 14-1/4" in diameter and 37-3/4" tall. Acorn will be made of vandal resistant clear textured polycarbonate or dent resistant (DR) clear textured acrylic. White textured is also available. The fixture is available in a solid roof (A840SR) for added distinction and reduced up-light. The solid roof will be made of spun aluminum and securely affixed to the top of the acorn. The optional perforated brass decorative ring (PBDR) is available in polished brass or painted finish. The 2-1/4" wide brass filigree allows light transfer through the decorative openings. The Luminaire shall be UL listed in US and Canada.

Fitter - Standard

The fitter shall be heavy wall cast aluminum, 356 alloy for high tensile strength. It shall have an 8-1/2" inside diameter opening to attach to the 8" neck of the acorn globe. When ordered with a Sternberg aluminum pole, the fitter shall be welded to the pole top or tenon for safety and to ensure the fixture will be plumb, secure and level over the life of the installation. The fitter shall have a one-piece ring bug gasket to resist insect penetration into lamp assembly.

900 Series Utility Fitter Option

The fitter shall be heavy wall cast aluminum, 360 die cast alloy for high tensile strength. It shall have a 9- 1/4" inside diameter opening to attach to the 8" neck of the acorn globe. It shall have a hinged, tool-less entry door that provides open access to all of the components. The 990 shall have an optional terminal block for ease of wiring, an optional Twist-Lock Photocell receptacle, an optional single GFCI outlet for auxiliary power needs. The top mounted driver mounting plate shall be cast aluminum and provide tool-less removal from the housing using 2 finger latches. When ordered with a Sternberg aluminum pole, the fitter shall be set screwed to the pole top or tenon. The fitter shall have a one-piece ring bug gasket to resist insect penetration into lamp assembly. When supplied with GFI receptacle a hole will be provided for cord and plug installation with

A840-VCOB OLD TOWN SERIES

LED

the access door closed. When cord and plug is not in use a filler plug will be provided and shall be tethered to the fitter for easy recovery and installation.

Twist-Lock Fitter (Optional)

The TL (Twist-Lock) fitter shall have an aluminum die-cast twist-lock mechanism. The tool-less 1/4 turn action allows for easy globe removal and replacement. A die-cast ring assembly is mechanically attached to the globe and is removable if the globe is broken or replaced.

LED's

The luminaire shall use high output, high brightness LED's, consisting of a two piece assembly complete with Chip on Board (COB) LED component and COB holder frame mounted to vertical heat sinks. The LED's and printed circuit boards shall be 100% recyclable; they shall also be protected from moisture and corrosion by a conformal coating. They shall not contain lead, mercury or any other hazardous substances and shall be RoHS compliant. The LED life rating data shall be determined in accordance with IESNA LM-80. The High Performance white LED's will have a life expectancy of approximately 100,000 hours with not less than 70% of original brightness (lumen maintenance), rated at 25°C. The High Brightness, High Output LED's shall be 4000K (2700K, 3000K or 5000K option) color temperature with a minimum CRI of 70. Consult factory for custom color CCT. The luminaire shall have a minimum _____ (see table) delivered initial lumen rating when operated at steady state with an average ambient temperature of 25°C (77°F).

Optics

The luminaire shall be provided with individual, molded silicone refractor type optics applied to each COB (Chip On Board) LED assembly. The optic shall be at least 92% efficient while providing superior thermal, UV and impact resistance for the COB assembly. The optic helps efficiently shape and distribute the light while minimizing up-light. The luminaire shall provide Symmetric and Asymmetric light distribution. Testing shall be done in accordance with IESNA LM-79.

Electronic Drivers

The LED driver shall be U.L. Recognized. It shall be securely mounted inside the fixture, for optimized performance and longevity. It shall be supplied with a quick-disconnect electrical connector on the power supply, providing easy power connections and fixture installation. It shall have overload, overheat and short circuit protection, and have a DC voltage output, constant current design, 50/60HZ. It shall be supplied with line-ground, line-neutral and neutral-ground electrical surge protection in accordance with IEEE/ANSI C62.41.2 guidelines. It shall be a high efficiency driver with a THD less than 20% and a high power factor greater than .9. It shall be dimming capable using a 0-10v signal, consult factory for more information.

Photocontrols

Button Style: The photocontrol shall be mounted on the fixture and pre-wired to driver. The electronic button type photocontrol is instant on with a 5-10 second turn off, and shall turn on at 1.5 footcandles with a turn-off at 2-3 footcandles. Photocontrol is 120-277 volt and warranted for 6 years. See pole spec sheet for pole mounted version.

Twist-Lock Style: The photocontrol shall be mounted in the utility fitter and pre-wired to driver. The twist lock type photocontrol is instant on with a 3-6 second turn off, and shall turn on at 1.5 footcandles with a turn-off at 2-3 footcandles. Photocontrol is 120-277 volt and warranted for 6 years.

Warranty

Seven-year limited warranty. See product and finish warranty guide for details.

Finish

Refer to website for details.

NIGHTTIME FRIENDLY™

Consistent with LEED® goals
& Green Globes™ criteria
for light pollution reduction

Roadway Series 115

Roadway Lighting — Cutoff Style

50-400W HPS, 70-250W MH

PRODUCT OVERVIEW

Features:

Rugged die-cast aluminum housing is powder-coated for durability and corrosion resistance

Two-bolt mast arm mount provides easy, secure installation and adjustability for arms from 1-1/4" to 2" (1-5/8" to 2-3/8" O.D.) diameter. Optional four-bolt mounting provides extra security in high-vibration applications

Die-cast trigger latch on doorframe enables easy and secure one-hand opening for re-lamping and maintenance

Large surface area "breathing seal" gasket seals the optical chamber to prevent intrusion by insects and environmental contaminants. Heat-resistant gasket material remains effective over the life of the fixture

Wildlife shield is cast into the housing (not a separate piece) on the two-bolt unit and is easily adjustable for 1-1/4" to 2" (1-5/8" to 2-3/8" O.D.) mast arms.

Photocontrol receptacle is adjustable without tools

Anodized aluminum reflectors provide uniform lighting distribution with either flat or sag clear tempered glass

NEMA wattage label, terminal block, and NEMA photocontrol receptacle are standard

E39 mogul base socket standard

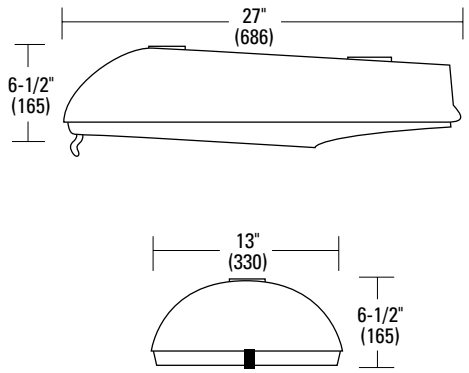
Suitable for -40°C

Complies with ANSI: C136.2, C136.10, C136.14, C136.15, C136.31

Applications:

- Roadways
- Residential streets
- Storage areas
- Parking lots
- Campuses
- Parks

DIMENSIONS



Effective Projected Area (EPA)
The EPA for the Horizontal Luminaire Series 115 with cutoff is .74 sq. ft.
Approx. Wt. = 19 lbs.

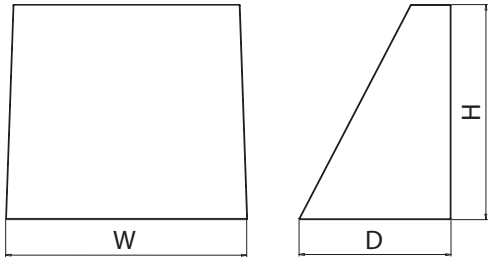
Specifications

Depth: 5.5"
Height: 8"
Width: 9"
Weight: (without options) 9 lbs



Introduction

The WDGE LED family is designed to meet specifier's every wall-mounted lighting need in a widely accepted shape that blends with any architecture. The clean rectilinear design comes in four sizes with lumen packages ranging from 1,200 to 25,000 lumens, providing true site-wide solution.

WDGE1 delivers up to 2,000 lumens with a soft, non-pixelated light source, creating a visually comfortable environment. The compact size of WDGE1, with its integrated emergency battery backup option, makes it an ideal over-the-door wall-mounted lighting solution.

WDGE LED Family Overview

Luminaire	Standard EM, 0°C	Cold EM, -20°C	Sensor	Lumens (4000K)					
				P1	P2	P3	P4	P5	P6

Performance Data

Lumen Output

Lumen values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of the configurations shown, within the tolerances allowed by Lighting Facts. Contact factory for performance data on any configurations not shown here.

Performance Package	System Watts	Dist. Type	27K (2700K, 80 CRI)		30K (3000K, 80 CRI)		35K (3500K, 80 CRI)		40K (4000K, 80 CRI)		50K (5000K, 80 CRI)	
			Lumens	LPW	Lumens	LPW	Lumens	LPW	Lumens	LPW	Lumens	LPW
P1	10W	VF	1,120	112	1,161	116	1,194	119	1,227	123	1,235	123
		VW	1,122	112	1,163	116	1,196	120	1,229	123	1,237	124
P2	15W	VF	1,806	120	1,872	125	1,925	128	1,978	132	1,992	133
		VW	1,809	120	1,876	125	1,929	128	1,982	132	1,996	133

Electrical Load

Performance Package	System Watts	Current (A)				
		120V	208V	240V	277V	347V
P1	10W	0.082	0.049	0.043	0.038	--
	13W	--	--	--	--	0.046
P2	15W	0.132	0.081	0.072	0.064	--
	18W	--	--	--	--	0.056

Lumen Multiplier for 90CRI

CCT	Multiplier
27K	0.845
30K	0.867
35K	0.845
40K	0.885
50K	0.898

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Ambient		Lumen Multiplier
0°C	32°F	1.03
10°C	50°F	1.02
20°C	68°F	1.01
25°C	77°F	1.00
30°C	86°F	0.99
40°C	104°F	0.98

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the platforms noted in a 25°C ambient, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Operating Hours	0	25,000	50,000	100,000
Lumen Maintenance Factor	1.0	>0.96	>0.95	>0.91

Photometric Diagrams

To see complete photometric reports or download .ies files for this product, visit the Lithonia Lighting WDGE LED homepage. Tested in accordance with IESNA LM-79 and LM-80 standards.

WDGE1 LED P2 40K 80CRI VF

Emergency Egress Options

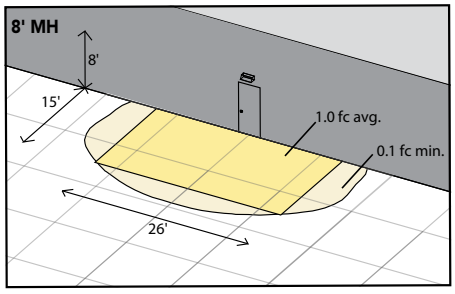
Emergency Battery Backup

The emergency battery backup is integral to the luminaire — no external housing required! This design provides reliable emergency operation while maintaining the aesthetics of the product. All emergency battery backup configurations include an independent secondary driver with an integral relay to immediately detect loss of normal power and automatically energize the luminaire. The emergency battery will power the luminaire for a minimum duration of 90 minutes (maximum duration of three hours) from the time normal power is lost and maintain a minimum of 60% of the light output at the end of 90minutes.

Applicable codes: NFPA 70/NEC – section 700.16, NFPA 101 Life Safety Code Section 7.9

The example below shows illuminance of 1 fc average and 0.1 fc minimum in emergency mode with E4WH and VF distribution.

Grid = 10ft x 10ft



WDGE1 LED xx 40K 80CRI VF MVOLT E4WH

Dual Switching (DS) Option

The dual switching option offers operational redundancy that certain codes require. With this option the luminaire comes integrated with two drivers and two light engines. These work completely independent to each other so that a failure of any individual component does not cause the whole luminaire to go dark. This option is typically used with a back generator or inverter providing emergency power.

Applicable codes: NFPA 70/NEC – section 700.16, NFPA 101 Life Safety Code Section 7.9

FEATURES & SPECIFICATIONS

INTENDED USE
Common architectural look, with clean rectilinear shape, of the WDGE LED was designed to blend with any type of construction, whether it be tilt-up, frame or brick. Applications include commercial offices, warehouses, hospitals, schools, malls, restaurants, and other commercial buildings.

CONSTRUCTION
The single-piece die-cast aluminum housing integrates secondary heat sinks to optimize thermal transfer from the internal light engine heat sinks and promote long life. The driver is mounted in direct contact with the casting for a low operating temperature and long life. The die-cast door frame is fully gasketed with a one-piece solid silicone gasket to keep out moisture and dust, providing an IP66 rating for the luminaire.

FINISH
Exterior painted parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a 3 mils thickness for a finish that can withstand extreme climate changes without cracking or peeling. Standard Super Durable colors include dark bronze, black, natural aluminum, sandstone and white. Available in textured and non-textured finishes.

OPTICS
Well crafted reflector optics allow the light engine to be recessed within the luminaire, providing visual comfort, superior distribution, uniformity, and spacing in wall-mount applications. The WDGE LED has zero uplight and qualifies as a Nighttime Friendly™ product, meaning it is consistent with the LEED® and Green Globes™ criteria for eliminating wasteful uplight.

ELECTRICAL
Light engine consists of high-efficacy LEDs mounted to metal-core circuit boards to maximize heat dissipation and promote long life (up to L91/100,000 hours at 25°C). The electronic driver has a power factor of >90%, THD <20%. Luminaire comes with built in 6kV surge protection, which meets a minimum Category C low exposure (per ANSI/IEEE C62.41.2).

INSTALLATION
A universal mounting plate with integral mounting support arms allows the fixture to hinge down for easy access while making wiring connections. The 3/8″ Architectural Wall Spacer (AWS) can be used to create a floating appearance or to accommodate small imperfections in the wall surface.

LISTINGS
CSA certified to U.S. and Canadian standards. Luminaire is IP66 rated. PIR options are rated for wet location. Rated for -40°C minimum ambient.
DesignLights Consortium® (DLC) Premium qualified product and DLC qualified product. Not all versions of this product may be DLC Premium qualified or DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.

WARRANTY
5-year limited warranty. Complete warranty terms located at:
www.acuitybrands.com/support/customer-support/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

Introduction

The WDGE LED family is designed to meet specifier's every wall-mounted lighting need in a widely accepted shape that blends with any architecture. The clean rectilinear design comes in four sizes with lumen packages ranging from 1,200 to 25,000 lumens, providing a true site-wide solution. Embedded with nLight® AIR wireless controls, the WDGE family provides additional energy savings and code compliance.

WDGE2 delivers up to 6,000 lumens with a soft, non-pixelated light source, creating a visually comfortable environment. When combined with multiple integrated emergency battery backup options, including an 18W cold temperature option, the WDGE2 becomes the ideal wall-mounted lighting solution for pedestrian scale applications in any environment.

Lumen Multiplier for 90CRI

CCT	Multiplier
27K	0.845
30K	0.867
35K	0.845
40K	0.885
50K	0.898

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Ambient		Lumen Multiplier
0°C	32°F	1.03
10°C	50°F	1.02
20°C	68°F	1.01
25°C	77°F	1.00
30°C	86°F	0.99
40°C	104°F	0.98

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the platforms noted in a 25°C ambient, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Operating Hours	0	25,000	50,000	100,000
Lumen Maintenance Factor	1.0	>0.96	>0.95	>0.91

Photometric Diagrams

To see complete photometric reports or download .ies files for this product, visit the Lithonia Lighting WDGE LED homepage. Tested in accordance with IESNA LM-79 and LM-80 standards.

WDGE2 LED P3 40K 80CRI VF

Emergency Egress Options

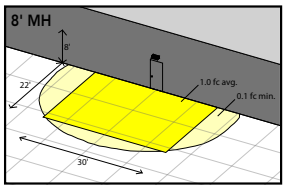
Emergency Battery Backup

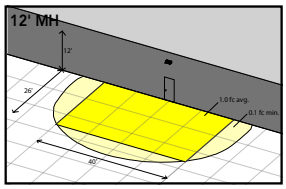
The emergency battery backup is integral to the luminaire — no external housing required! This design provides reliable emergency operation while maintaining the aesthetics of the product. All emergency battery backup configurations include an independent secondary driver with an integral relay to immediately detect loss of normal power and automatically energize the luminaire. The emergency battery will power the luminaire for a minimum duration of 90 minutes (maximum duration of three hours) from the time normal power is lost and maintain a minimum of 60% of the light output at the end of 90minutes.

Applicable codes: NFPA 70/NEC – section 700.16, NFPA 101 Life Safety Code Section 7.9

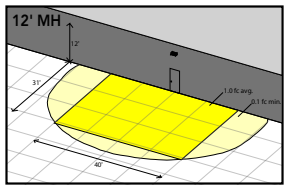
The examples below show illuminance of 1 fc average and 0.1 fc minimum in emergency mode with E10WH or E20WC and VF distribution.

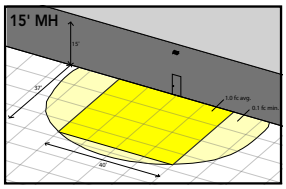
Grid = 10ft x 10ft





WDGE2 LED xx 40K 80CRI VF MVOLT E10WH



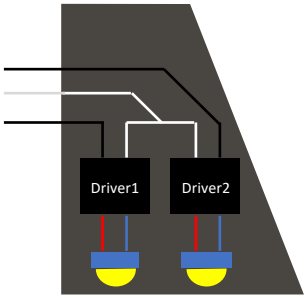


WDGE2 LED xx 40K 80CRI VF MVOLT E20WC

Dual Switching (DS) Option

The dual switching option offers operational redundancy that certain codes require. With this option the luminaire comes integrated with two drivers and two light engines. These work completely independent to each other so that a failure of any individual component does not cause the whole luminaire to go dark. This option is typically used with a back generator or inverter providing emergency power.

Applicable codes: NFPA 70/NEC – section 700.16, NFPA 101 Life Safety Code Section 7.9



Control / Sensor Options

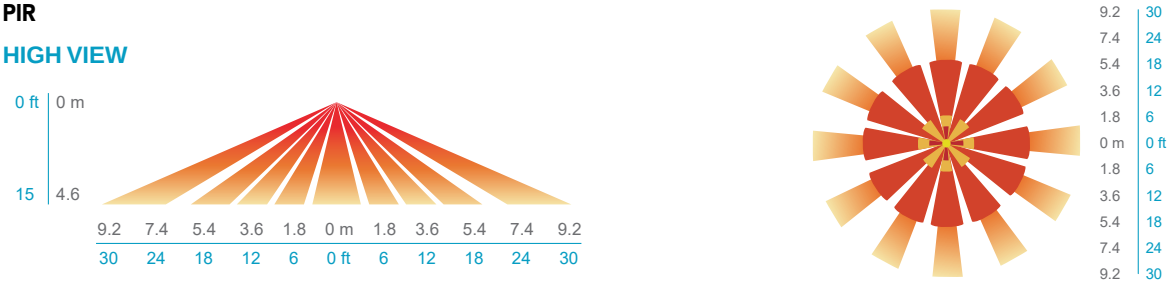
Motion/Ambient Sensor (PIR_, PIRH_)

Motion/Ambeint sensor (Sensor Switch MSOD) is integrated into the the luminaire. The sensor provides both Motion and Daylight based dimming of the luminaire. For motion detection, the sensor utilizes 100% Digital Passive Infrared (PIR) technology that is tuned for walking size motion while preventing false tripping from the environment. The integrated photocell enables additional energy savings during daytime periods when there is sufficient daylight. Optimize sensor coverage by either selecting PIR or PIRH option. PIR option comes with a sensor lens that is optimized to provide maximum coverage for mounting heights between 8-15ft, while PIRH is optimized for 15-40ft mounting height.

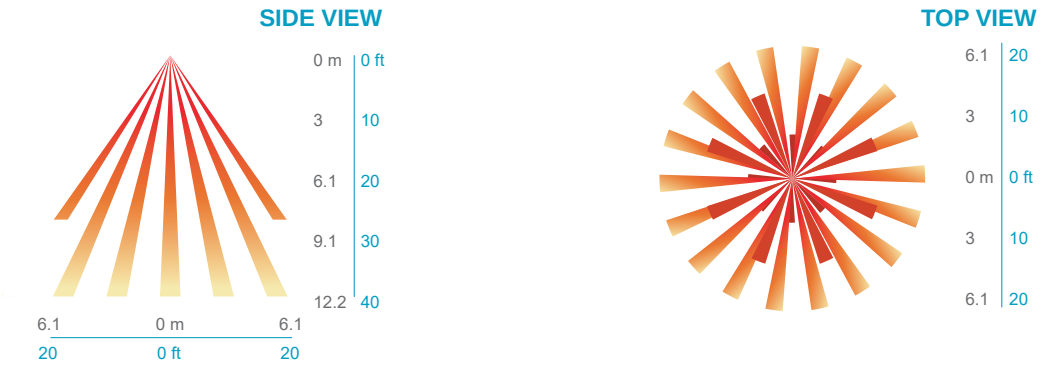
Networked Control (NLTAIR2)

nLight® AIR is a wireless lighting controls platform that allows for seamless integration of both indoor and outdoor luminaires. Five-tier security architecture, 900 MHz wireless communication and app (CLAIRITY™ Pro) based configurability combined together make nLight® AIR a secure, reliable and easy to use platform.

PIR



PIRH



Option	Dim Level	High Level (when triggered	Photocell Operation	Motion Time Delay	Ramp-down Time	Ramp-up Time
PIR or PIRH	Motion - 3V (37% of full output) Photocell - 0V (turned off)	10V (100% output)	Enabled @ 5fc	5 min	5 min	Motion - 3 sec Photocell - 45 sec

FEATURES & SPECIFICATIONS

INTENDED USE
Common architectural look, with clean rectilinear shape, of the WDGE LED was designed to blend with any type of construction, whether it be tilt-up, frame or brick. Applications include commercial offices, warehouses, hospitals, schools, malls, restaurants, and other commercial buildings.

CONSTRUCTION
The single-piece die-cast aluminum housing integrates secondary heat sinks to optimize thermal transfer from the internal light engine heat sinks and promote long life. The driver is mounted in direct contact with the casting for a low operating temperature and long life. The die-cast door frame is fully gasketed with a one-piece solid silicone gasket to keep out moisture and dust, providing an IP66 rating for the luminaire.

FINISH
Exterior painted parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a 3 mils thickness for a finish that can withstand extreme climate changes without cracking or peeling. Standard Super Durable colors include dark bronze, black, natural aluminum, sandstone and white. Available in textured and non-textured finishes.

OPTICS
Well crafted reflector optics allow the light engine to be recessed within the luminaire, providing visual comfort, superior distribution, uniformity, and spacing in wall-mount applications. The WDGE LED has zero uplight and qualifies as a Nighttime Friendly™ product, meaning it is consistent with the LEED® and Green Globes™ criteria for eliminating wasteful uplight.

ELECTRICAL
Light engine consists of high-efficacy LEDs mounted to metal-core circuit boards to maximize heat dissipation and promote long life (up to L91/100,000 hours at 25°C). The electronic driver has a power factor of >90%, THD <20%. Luminaire comes with built in 6kV surge protection, which meets a minimum Category C low exposure (per ANSI/IEEE C62.41.2).

INSTALLATION
A universal mounting plate with integral mounting support arms allows the fixture to hinge down for easy access while making wiring connections. The 3/8″ Architectural Wall Spacer (AWS) can be used to create a floating appearance or to accommodate small imperfections in the wall surface.

LISTINGS
CSA certified to U.S. and Canadian standards. Luminaire is IP66 rated. PIR options are rated for wet location. Rated for -40°C minimum ambient.
DesignLights Consortium® (DLC) Premium qualified product and DLC qualified product. Not all versions of this product may be DLC Premium qualified or DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.

WARRANTY
5-year limited warranty. Complete warranty terms located at:
www.acuitybrands.com/support/customer-support/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

PLANTING NOTES

1. SEE SHEET L101 FOR PLANTING PLAN. SEE SHEET L201 FOR PLANTING DETAILS.
2. THE LANDSCAPE CONTRACTOR SHALL OBTAIN AND PAY FOR ALL PERMITS AND FEES THAT MAY BE REQUIRED FOR HIS PORTION OF WORK.
3. ESTIMATED SCHEDULE FOR PLANTING IS FALL 2021.
4. IN CASE OF DISCREPANCIES BETWEEN THE PLAN AND THE PLANT LIST, THE GRAPHIC SYMBOLS SHOWN ON THE PLAN SHALL DICTATE.
5. PLANT MATERIALS:
   - 5.1. ALL PLANT MATERIALS SHALL MEET OR EXCEED THE AMERICAN STANDARDS FOR NURSERY STOCK, 1986 EDITION, AS SET FORTH BY AMERICAN ASSOCIATION OF NURSERYMEN.
   - 5.2. PLANTS SHALL BE SOUND, HEALTHY, VIGOROUS, AND FREE FROM INSECT PESTS, PLANT DISEASES, AND INJURIES. PLANTS SHALL BE EQUAL TO OR EXCEED THE MEASUREMENTS SPECIFIED IN THE PLANT LIST.
   - 5.3. TREES SHALL HAVE STRAIGHT TRUNK WITH LEADER INTACT, UNDAMAGED AND UNCUT. BRANCHING MUST BE WELL DEVELOPED.
   - 5.4. ALL PLANT MATERIAL AND SEED SHALL BE PROVIDED FROM A NURSERY (WITHIN 200 MILES) WITH A SIMILAR PLANT HARDINESS ZONE AS PROJECT LOCATION.
   - 5.5. NO SUBSTITUTIONS OF PLANT MATERIALS WILL BE ALLOWED. IF PLANTS ARE NOT AVAILABLE, THE CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT PRIOR TO BID IN WRITING. ALL PLANTS SHALL BE INSPECTED AND TAGGED WITH PROJECT I.D. AT NURSERY OR CONTRACTORS OPERATIONS PRIOR TO MOVING TO JOB SITE. PLANTS MAY BE INSPECTED AND APPROVED OR REJECTED ON THE JOB SITE BY LANDSCAPE ARCHITECT.
   - 5.6. LANDSCAPE CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT IN WRITING PRIOR TO BID DATE OF ANY PLANTS HE/SHE FEELS MAY NOT SURVIVE IN LOCATIONS NOTED ON PLANS
6. IRRIGATION:
   - 6.1. CONTRACTOR SHALL PROVIDE BID ALTERNATE FOR IRRIGATION SHALL BE PROVIDED PER IRRIGATION PERFORMANCE DRAWING AND NOTES.
   - 6.2. IF BID ALTERNATE OF IRRIGATION SYSTEM IS NOT SELECTED BY OWNER, CONTRACTOR RESPONSIBLE FOR ESTABLISHMENT WATERING THROUGH TEMPORARY FACILITIES, WATERING BAGS, ETC., AS APPROVED BY OWNER FOR PLANT WARRANTY.
7. TOPSOIL & PLANTING MIXTURES:
   - 7.1. CONTRACTOR SHALL ENSURE THAT SOIL CONDITIONS AND COMPACTION ARE ADEQUATE TO ALLOW FOR PROPER DRAINAGE AROUND THE CONSTRUCTION SITE. UNDESIRABLE CONDITIONS SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT PRIOR TO BEGINNING OF WORK. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO ENSURE PROPER SURFACE AND SUBSURFACE DRAINAGE IN ALL AREAS
   - 7.2. SALVAGE TOPSOIL FROM THE EARTHWORK AREAS AS APPROPRIATE AND/OR AS DIRECTED BY LANDSCAPE ARCHITECT AND STOCKPILE FOR REUSE IN LOCATION APPROVED BY OWNER.
   - 7.3. TOPSOIL SHALL BE MATERIALS CONSISTING OF FERTILE, FRIABLE, FIND SANDY LOAM, UNIFORM IN COMPOSITION AND FREE OF SUBSOIL, STONES, LUMPS, CLODS OF HARD EARTH, PLANTS, PLANT ROOTS, STICKS, NOXIOUS WEEDS, SLAG, CINDERS, DEMOLITION DEBRIS OR OTHER EXTRANEOUS MATTER OVER 1" IN LARGEST DIMENSION.
   - 7.4. EXISTING TOPSOIL SHALL BE PREPARED BY THOROUGHLY MIXING IN ORGANIC MATTER AT THE RATE OF 1/3 VOLUME OF SOIL REPLACED.
     - 7.4.1. ADJUST SOIL TO A pH OF 6.0 TO 6.5.
     - 7.4.2. ORGANIC MATTER: 4% MIN, 10% MAX
     - 7.4.3. AVAILABLE PHOSPHORUS: 25 PPM, MIN
     - 7.4.4. EXCHANGEABLE POTASSIUM: 125 PPM, MIN
   - 7.5. PEATMOSS TO BE USED ON PROJECT SHALL BE DOMESTIC OR IMPORTED MATERIAL, CHOCOLATE BROWN IN COLOR AND COMPOSED OF PARTIALLY DECOMPOSED VEGETABLE MATERIAL. PEAT MOSS TO BE MILDLY ACIDIC IN CHARACTER AND SHALL BE APPROVED BY LANDSCAPE ARCHITECT.
   - 7.6. SEED & SOD AREAS SHALL RECEIVE A MINIMUM OF 4" DEPTH OF TOPSOIL.
   - 7.7. PLANTING BEDS SHALL RECEIVE MINIMUM 6" DEPTH OF AMENDED TOPSOIL.
8. MULCH MATERIALS:
   - 8.1. ALL MULCH MATERIALS SHALL BE PROCESSED DOUBLE SHREDDED HARDWOOD BARK MULCH OF UNIFORM SIZE. NO UTILITY MULCH OR PROCESSED TREE TRIMMINGS WILL BE ALLOWED. SUBMIT SAMPLE TO ARCHITECT.
   - 8.2. MULCH SHALL BE 2-INCH THICKNESS MINIMUM COVERAGE IN ALL AREAS OF TREE PITS OR PLANTING BEDS, UNLESS OTHERWISE NOTED.
   - 8.3. MULCH SHALL BE HELD 1" BELOW SURFACE ELEVATION OF DOWNHILL SIDE OF WALK, SLAB, CURB, LAWN, ETC.
9. LANDSCAPE BED EDGING:
   - 9.1. ALL LANDSCAPE BED EDGING SHALL BE SHOVEL-CUT SPADE EDGE BETWEEN LAWN AREAS, UNLESS OTHERWISE NOTED.
10. STORAGE, INSTALLATION, MAINTENANCE & WARRANTY:
    - 10.1. CONFIRM LOCATION OF ALL UNDERGROUND UTILITIES PRIOR TO START OF CONSTRUCTION.
    - 10.2. EXISTING TREES FOUND ON SITE SHALL BE PROTECTED AND SAVED UNLESS NOTED TO BE REMOVED OR ARE LOCATED IN AN AREA TO BE GRADED. NO VEHICLES OR EQUIPMENT ARE ALLOWED WITHIN THE DRIP LINE OF TREES TO BE PROTECTED. QUESTIONS REGARDING EXISTING PLANT MATERIAL SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT PRIOR TO REMOVAL.
    - 10.3. PRUNING AND REMOVAL OF BRANCHES ON EXISTING TREES SHALL BE DIRECTED IN THE FIELD BY OWNER OR LANDSCAPE ARCHITECT.
    - 10.4. EQUIPMENT, PLANTS AND ALL OTHER MATERIALS TO BE STORED ON SITE WILL BE STORED OUTSIDE OF THE DRIPLINE OF TREES TO BE PROTECTED AND PLACED WHERE THEY WILL NOT CONFLICT W/ CONSTRUCTION OPERATIONS.
    - 10.5. NEW PLANTING AREAS ARE TO BE TREATED WITH HERBICIDE TO KILL ALL EXISTING GROUNDCOVER. THERE SHALL BE A MINIMUM OF TWO (2) APPLICATIONS SEPARATED BY 10 DAYS. IF ALL EXISTING GROUNDCOVER VEGETATION IS NOT KILLED WITHIN 10 DAYS OF 2ND APPLICATION, A 3RD APPLICATION IS REQUIRED.
    - 10.6. WHERE PROPOSED PLANTING ARE INDICATED IN EXISTING PAVING AREAS, CONTRACTOR SHALL EXCAVATE A MINIMUM OF 2'-0" BELOW PAVING SURFACE.
    - 10.7. FINAL PLACEMENT OF PLANT MATERIALS, ETC., SHALL BE APPROVED BY LANDSCAPE ARCHITECT BEFORE PLANTING OPERATIONS ARE TO PROCEED. ALL TREE LOCATIONS SHALL BE MARKED WITH A WOOD STAKE INDICATING VARIETY AND SIZE OF TREE. ALL GROUND COVER AND PLANTING BED LINES SHALL BE MARKED W/ HIGHLY VISIBLE PAINT LINES W/ OCCASIONAL WOOD STAKES FOR REFERENCE. ALL STAKES SHALL BE REMOVED FOLLOWING PLANTING OPERATIONS. LANDSCAPE ARCHITECT RESERVES THE RIGHT TO ADJUST PLANT LOCATIONS ON SITE.
    - 10.8. ALL DISTURBED AREAS OUTSIDE THE LIMITS OF WORK SHALL BE RESTORED TO ORIGINAL OR BETTER CONDITION AT NO ADDITIONAL COST TO THE OWNER.
    - 10.9. PRIOR TO FINAL PAYMENT, CONTRACTOR SHALL COORDINATE A FINAL INSPECTION WALK-THROUGH WITH OWNER AND LANDSCAPE ARCHITECT FOR OWNER ACCEPTANCE. THE LANDSCAPE ARCHITECT WILL PROVIDE A PUNCHLIST OF ANY DEFICIENCIES AND PROVIDE TO OWNER AND CONTRACTOR FOR REVIEW.
    - 10.10. INCLUDE PRICING WITH THE BID FOR A 60-DAY MAINTENANCE PERIOD OF ALL LANDSCAPE PLANTINGS FOLLOWING COMPLETE INSTALLATION AND FINAL INSPECTION BY LANDSCAPE ARCHITECT. MAINTENANCE SHALL INCLUDE WATERING, WEEDING, CULTIVATING, MULCHING, MOWING, AND ALL OTHER NECESSARY OPERATIONS REQUIRED FOR PROPER ESTABLISHMENT OF LAWNS AND PLANTINGS.
    - 10.11. ALL LANDSCAPE PLANTINGS SHALL BE WARRANTED FOR A PERIOD OF ONE YEAR FOLLOWING FINAL INSPECTION BY LANDSCAPE ARCHITECT. AT THE END OF THIS PERIOD, PLANT MATERIAL TERMED DEAD OR UNSATISFACTORY BY LANDSCAPE ARCHITECT SHALL BE REPLACED AT NO ADDITIONAL CHARGE BY THE LANDSCAPE CONTRACTOR. THE REPLACEMENTS SHALL ALSO BE WARRANTED FOR 1 YEAR.

IRRIGATION NOTES:

1. CONTRACTOR SHALL PROVIDE DESIGN/BUILD IRRIGATION SYSTEM PER THE IRRIGATION NOTES BELOW:
   - 1.1. DESIGN GUIDELINES: CONTRACTOR TO VERIFY PRESSURE AND AVAILABLE WATER SERVICE SIZE
   - 1.2. EMISSION (LAWNS): HUNTER I-40 SPRAY ROTARS (OR APPROVED EQUAL)
   - 1.3. DRIP (BEDS): HUNTER HDL-CV (OR APPROVED EQUAL)
   - 1.4. QUICK COUPLER: HUNTER QCV - 3RC
   - 1.5. CONTROLLER: HUNTER HCC (OR APPROVED EQUAL)
   - 1.6. SENSOR: HUNTER SOLAR-SYNC & HC FLOW METER (OR APPROVED EQUAL)
   - 1.7. PIPING: PVC OR APPROVED EQUAL
2. CONTRACTOR SHALL PROVIDE A QUALIFIED IRRIGATION DESIGNER OR IRRIGATION CONSULTANT TO DESIGN THE SYSTEM FOR EFFICIENT AND UNIFORM DISTRIBUTION OF WATER. "QUALIFIED" MEANS CERTIFIED BY ONE THE FOLLOWING AGENCIES BELOW:
   - 2.1. CERTIFIED IRRIGATION CONTRACTOR (CIC)
   - 2.2. CERTIFIED LANDSCAPE IRRIGATION AUDITOR (CLIA)
   - 2.3. CERTIFIED LANDSCAPE IRRIGATION MANAGER (CLIM)
   - 2.4. CERTIFIED IRRIGATION DESIGNER (CID)
   - 2.5. CERTIFIED WATER CONSERVATION MANAGER-LANDSCAPE (CWCM)
3. SYSTEM DESIGN:
   - 3.1. THE SYSTEM SHALL BE COMPRISED OF EITHER:
     - 3.1.1. DRIP/MICRO-IRRIGATION COMPONENTS THAT ALLOW FOR HIGHER DISTRIBUTION UNIFORMITY AND LOWER EVAPORATION AND RUNOFF.
     - 3.1.2. THE DESIGN AND LAYOUT OF THE EMISSION DEVICES PROVIDES FOR ZERO OVERSPRAY ACROSS OR ONTO A STREET, PUBLIC DRIVEWAY OR SIDEWALK, PARKING AREA, BUILDING, FENCE OR ADJOINING PROPERTY. OVERSPRAY MAY OCCUR DURING THE OPERATION OF THE IRRIGATION SYSTEM DUE TO THE ACTUAL WIND CONDITION THAT DIFFER FROM THE DESIGN CRITERIA.
4. SYSTEM CONTROLLER:
   - 4.1. THE SYSTEM SHOULD USE A CONTROLLER THAT HAS MULTI-PROGRAM CAPABILITY WITH AT LEAST FOUR START TIMES(FOR MULTIPLE REPEAT SOAK CYCLES) AND RUN TIME ADJUSTMENT IN ONE MINUTE INCREMENTS. THE CONTROLLER PROGRAMMING (SCHEDULING) SHOULD BE MANAGED TO RESPOND TO THE CHANGING NEED FOR WATER IN THE LANDSCAPE.
5. DESIGN FEATURES:
   - 5.1. FOLLOW ALL ORDINANCES RELATING TO IRRIGATION SYSTEMS INCLUDING THE INSTALLATION OF BACKFLOW DEVICES.
   - 5.2. INSTALL A MASTER VALVE TO STOP UNSCHEDULED FLOW OF IRRIGATION WATER
   - 5.3. A DESIGN THAT RESULTS IN UNIFORM AND EFFICIENT COVERAGE. SPRINKLER HEAD SPACING SHOULD BE A MINIMUM OF "HEAD-TO-HEAD" (MINIMUM 50% OF DIAMETER) UNLESS THE COVERAGE IS DESIGNED FOR WIND DE-RATING. WIND DE-RATING SHOULD BE BASED ON AVERAGE NIGHTTIME WIND SPEED.
   - 5.4. A MINIMUM OF "HEAD-TO-HEAD" (MINIMUM OF 50% OF DIAMETER) UNLESS THE COVERAGE IS DESIGNED FOR WIND DE-RATING. WIND DE-RATING SHOULD BE BASED ON AVERAGE NIGHTTIME WIND SPEED. DESIGN TO AVOID OVERSPRAY ONTO HARDSCAPES, FENCES, BUILDINGS AND ADJOINING PROPERTY.
   - 5.5. HAVE SEPARATE STATIONS/ZONES (HYDROZONES) FOR AREAS WITH DISSIMILAR WATER OR SCHEDULING REQUIREMENTS
   - 5.6. PROVIDE SENSOR TO SUSPEND IRRIGATION DURING WET WEATHER CONDITIONS.
   - 5.7. PROVIDE FLOW METER FOR MONITORING FLOW CONDITIONS AND SAVING WATER.
   - 5.8. PROVIDE OWNER WITH WALKTHROUGH FOR SYSTEM OPERATIONS, PRIOR TO FINAL ACCEPTANCE. INCLUDE PROCEDURES FOR CONTROLLER PROGRAMMING, MAINTENANCE AND WINTERIZATION.

FOLLOWING TO BE POSTED ON-SITE PER SECTION 4.8

1. A COPY OF THE APPROVED LANDSCAPE PLAN:
   - 1.1. NO SMALLER THAN 11 INCHES BY 17 INCHES
   - 1.2. LAMINATED TO PROTECT THE PLAN
   - 1.3. SHOWING ALL PLANT TYPES, SIZES, AND LOCATIONS
2. AN INSTRUCTIONAL SIGN:
   - 2.1. NO SMALLER THAN 11 INCHES BY 17 INCHES
   - 2.2. LAMINATED TO PROTECT THE SIGN
   - 2.3. STATING THE FOLLOWING:
     - 2.3.1. "THE OWNER OF THIS SITE HAS AGREED TO INSTALL AND MAINTAIN THE REQUIRED LANDSCAPING ON THIS SITE IN ACCORDANCE WITH THE TOWN OF MUNSTER LANDSCAPE ORDINANCE. COMPLIANCE REQUIRES THE FOLLOWING:
     - 2.3.2. NEW TREES AND SHRUBS WILL BE WATERED FOR THE FIRST TWO YEARS UNTIL FIRMLY ESTABLISHED.
     - 2.3.3. NEW TREES AND SHRUBS WILL BE PRUNED TO REMOVE DEAD OR DAMAGED WOOD.
     - 2.3.4. MULCH IN PLANTING BEDS WILL BE MAINTAINED AT A DEPTH OF THREE INCHES.
     - 2.3.5. ALL PLANTING BEDS AND TREE MULCH CIRCLES WILL BE WEEDED REGULARLY.
     - 2.3.6. PERENNIALS AND HERBACEOUS SHRUBS WILL BE PRUNED BEFORE THE ONSET OF NEW SPRING GROWTH.
     - 2.3.7. ALL GRASS WILL BE MOWED REGULARLY (I.E. ONCE PER WEEK) DURING THE GROWING SEASON.
3. THE SIGN SHALL ALSO STATE: "IF YOU SEE ANY PROBLEMS WITH THE LANDSCAPING OF THIS SITE OR THE MAINTENANCE OF IT, PLEASE CALL THE TOWN OF MUNSTER, BUILDING DEPARTMENT AT 219-836-6990".

SWORN STATEMENT BY OWNER:

THE UNDERSIGNED ACKNOWLEDGES THAT THE LANDSCAPE PLANTING PLAN SHOWN ON THE ATTACHED LANDSCAPE PLAN(S) FOR THE MAPLE LEAF CROSSING PLANNED UNIT DEVELOPMENT, TOWN OF MUNSTER, INDIANA HAS TO THE BEST OF THE UNDERSIGNED APPLICANT'S KNOWLEDGE, BEEN DESIGNED AND WILL BE INSTALLED, MAINTAINED AND REPLACED AS REQUIRED BY CURRENT AND SUBSEQUENT OWNERS IN ACCORDANCE WITH THE REQUIREMENTS OF THE TOWN OF MUNSTER MUNICIPAL CODE, THE LANDSCAPING STANDARDS OF THE TOWN OF MUNSTER ZONING ORDINANCE, AND THE GUIDE TO THE TOWN OF MUNSTER LANDSCAPE ORDINANCE.

EXISTING PARKWAY AND ON-SITE INTERIOR TREES ARE TO BE PROTECTED WHILE PROJECT IS UNDER CONSTRUCTION AND WILL BE REPLACED BY CURRENT AND SUBSEQUENT OWNER IF DAMAGED.

SWORN STATEMENT BY REGISTERED LANDSCAPE ARCHITECT:

THE UNDERSIGNED LANDSCAPE ARCHITECT, REGISTERED IN THE STATE OF INDIANA, ACKNOWLEDGES THAT THE LANDSCAPE PLANTING PLAN AND CONSTRUCTION DETAILS SHOWN ON THE ATTACHED LANDSCAPE PLAN(S) FOR THE MAPLE LEAF CROSSING PLANNED UNIT DEVELOPMENT, TOWN OF MUNSTER, INDIANA HAS BEEN DESIGNED IN ACCORDANCE WITH THE REQUIREMENTS OF THE TOWN OF MUNSTER MUNICIPAL CODE, THE LANDSCAPING STANDARDS OF THE TOWN OF MUNSTER ZONING ORDINANCE, AND THE GUIDE TO THE TOWN OF MUNSTER LANDSCAPE ORDINANCES.

PLANTING SCHEDULE

KEY	QTY.	BOTANICAL NAME	COMMON NAME	SIZE	SPACING	COMMENTS
DECIDUOUS TREES
