RE: 2024 Update to ADA Transition Plan

---

### **Background**

In 2012, the Town Council adopted an ADA Transition Plan outlining steps the Town would take to ensure that Town facilities, services, programs, and events will be accessible to persons with disabilities. As a recipient of federal funding, the Town is required to maintain this transition plan and update it periodically.

### **Methodology**

The initial plan was adopted in 2012, revised in 2018, and again in 2022.

The plan is updated annually to document the progress made each year toward improving our public infrastructure. In 2023, approximately 6,900 linear feet of sidewalk was replaced under the Town's 50/50 sidewalk replacement program. In addition, 47 curb ramps were upgraded to current ADA requirements on streets that were repaved through Town paving projects.

### **Recommendation**

By motion and voice vote, approve the 2024 ADA Transition Plan as presented.
