Re: Fire Department Cot purchase

Background

The fire department purchased unit 2260 earlier this year and needs to purchase a cot for this unit.

The Cot is needed before the unit can be certified from the state EMS commission. The Cot is a Stryker 6506 power pro. This Cot has powered raise and lower, which is the industry standard and prevents back injuries from lifting and lowering the Cot.

Attached is a copy of the quote for the Stryker 6506 MTS Powerpro and all necessary accessories for the installation into unit 2260, for the price of \$39,592.70.

Budget Note

The cost of \$39,592.70 will come from The Fire Departments CCD fund # 4402-91501-64422.

Recommendation

By motion and voice vote, approve the fire department to purchase 1 Stryker Cot with needed accessories for a TOTAL cost of \$39,592.70.
