Meeting: January 8, 2024

Re: CCMG 23-1 Paving and Water Main Improvements
Design Change Order for Bike Path Extension on Treadway Road

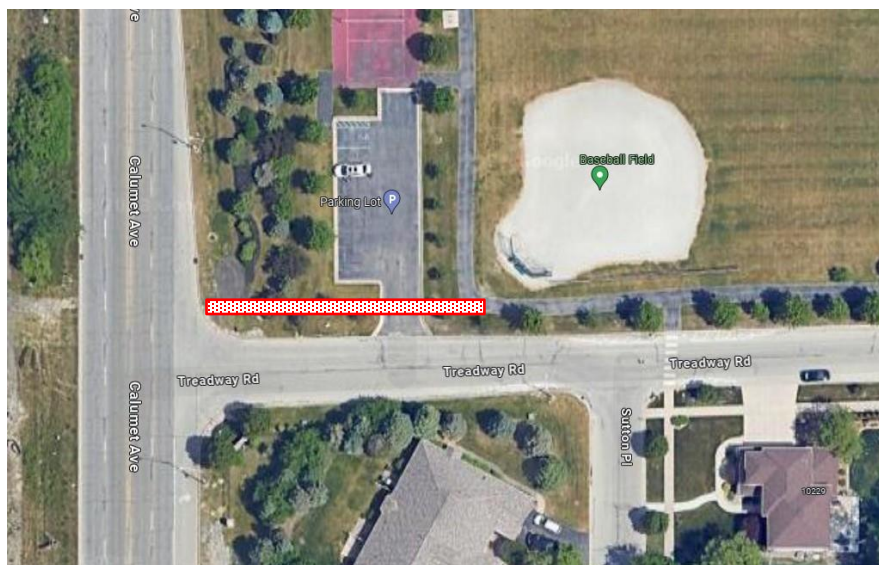

Background

On July 17, 2023, the Town Council awarded the construction contract for the CCMG 23-1 paving and water main project to Milestone Contractors North, Inc. The work includes paving and water main installation on Thicket Lane, Tamarack Place, and Pasturegate Lane which was completed last fall. Additional paving is to begin this spring on Treadway Road and Tudor Court. The original project includes extending the sidewalk on the south side of Treadway Road to the intersection at Calumet Avenue.

The construction of Treadway Road west of Calumet Avenue by Community Foundation of Northwest Indiana will be complete this spring. This project includes sidewalk on the south side and a multi-use trail on the north side of the Treadway Road extension.

Methodology

With a contractor already working in the area, this is the logical time to extend the bike path on the north side of Treadway Road at Cobblestone Path to continue to the intersection of Treadway Road and Calumet Avenue. The new traffic signal to be installed this spring will include a pedestrian phase to cross Calumet Avenue from both sides of Treadway.

SEH has provided a proposal to complete the topographical survey and engineering design necessary to add this trail to the current project plans. Their price for this work is \$5,500.

Budget Note

The funding source for the design and construction of this additional scope is the 2021 G.O. Bond, 4413-9152121-64972.

Recommendation

By motion and voice vote, authorize the Town Manager to engage SEH of Indiana, LLC to prepare the design for the bike path extension in the amount of \$5,500.
