

#141

Kevin Dark, Superintendent of Operations
Munster Parks and Recreation Department

Thank you for the opportunity to submit a bid for your 2026 Ford F-250 requirements. After reviewing the specifications outlined in your request, Graff Ford is pleased to provide a compliant quote with the following exceptions noted for clarity:

Bid Specification Exceptions

• **Transmission:**

The requested six-speed automatic transmission is no longer available on the 2026 model year F-250. The vehicle will be equipped with Ford's current 10-speed automatic transmission.

• **GVWR:**

The requested 10,250-lb GVWR is not available on the quoted configuration. The closest available rating is 10,300 lbs.

• **Alternator:**

The specification calls for a 220-amp alternator. The quoted vehicle includes Ford's 410-amp dual-alternator system, which exceeds the requested capacity.

• **Roof-Top Wiring:**

Roof-top wiring is not offered as a stand-alone option on the 2026 F-250. However, the required functionality should be achieved by utilizing the factory upfitter switches, which allow for proper integration of auxiliary equipment.

• **Skid Plate:**

A front skid plate is not available as a stand-alone option. The submitted quote does not include a skid plate.

If a skid plate is required, it can be added through one of the following packages:

- FX4 Off-Road Package – Additional \$600 (see attached)
- XL Off-Road Package – Additional \$995 (see attached)

Graff Ford remains committed to providing the Town of Munster with a vehicle that meets your operational needs while aligning with Ford's current production offerings. If you have any questions or would like to discuss these exceptions further, we are happy to assist.

Thank you for your consideration.

Vehicle Dimension and Performance Summary

Performance predictions in this report represent an estimate of vehicle performance based on standard operating conditions. Variations in customer equipment, load configuration, ambient conditions, and/or operator driving techniques can cause significant variations in vehicle performance. These values are not representative of results that may be shown in actual dynamometer tests. This report should therefore be used as a guide for comparative vehicle performance.

#143

Kevin Dark, Superintendent of Operations
Munster Parks and Recreation Department

Thank you for the opportunity to submit a bid for your 2026 Ford F-250 requirements. After reviewing the specifications outlined in your request, Graff Ford is pleased to provide a compliant quote with the following exceptions noted for clarity:

Bid Specification Exceptions

• **Transmission:**

The requested six-speed automatic transmission is no longer available on the 2026 model year F-250. The vehicle will be equipped with Ford's current 10-speed automatic transmission.

• **GVWR:**

The requested 10,250-lb GVWR is not available on the quoted configuration. The closest available rating is 10,300 lbs.

• **Alternator:**

The specification calls for a 220-amp alternator. The quoted vehicle includes Ford's 410-amp dual-alternator system, which exceeds the requested capacity.

• **Roof-Top Wiring:**

Roof-top wiring is not offered as a stand-alone option on the 2026 F-250. However, the required functionality should be achieved by utilizing the factory upfitter switches, which allow for proper integration of auxiliary equipment.

• **Skid Plate:**

A front skid plate is not available as a stand-alone option. The submitted quote does not include a skid plate.

If a skid plate is required, it can be added through one of the following packages:

- FX4 Off-Road Package – Additional \$600 (see attached)
- XL Off-Road Package – Additional \$995 (see attached)

Graff Ford remains committed to providing the Town of Munster with a vehicle that meets your operational needs while aligning with Ford's current production offerings. If you have any questions or would like to discuss these exceptions further, we are happy to assist.

Thank you for your consideration.

Vehicle Dimension and Performance Summary

Performance predictions in this report represent an estimate of vehicle performance based on standard operating conditions. Variations in customer equipment, load configuration, ambient conditions, and/or operator driving techniques can cause significant variations in vehicle performance. These values are not representative of results that may be shown in actual dynamometer tests. This report should therefore be used as a guide for comparative vehicle performance.

Vehicle Dimension and Performance Summary

Performance predictions in this report represent an estimate of vehicle performance based on standard operating conditions. Variations in customer equipment, load configuration, ambient conditions, and/or operator driving techniques can cause significant variations in vehicle performance. These values are not representative of results that may be shown in actual dynamometer tests. This report should therefore be used as a guide for comparative vehicle performance.
