Axon Officer Safety Plan 7 +

Munster Police Department's response to provide the safest and most comprehensive and accountable public safety service to the Town of Munster.

Key Reasons/Features of Axon Officer Safety Plan 7+

- Safety

- Integrated Systems

- Future Proof Technology

- Cost-Savings Using OSP 7+ Bundle

- Community and Interagency Sharing and Cooperation

Safety

- Protect Citizens
  - Their Safety
  - Their Rights
  - Accountability of Officers
  - Wide-Scale Public Evidence Submission and Sharing
- Officers
  - Real time location and viewing of body and squad car cameras and drones
  - Random Automated Reviews for Training, Compliance, and Accountability
  - Quick Complaint Resolution
  - Protects Officers from Unfounded Complaints and Litigation
- Evidence
  - Secure transfer and storage of evidence
  - All digital evidence products go through same workflow to be secured and only accessible by approved persons.
  - Secure platform for sharing evidence between citizens, officers, prosecution, requests for public information without need to download data.

Integrated Systems

- All programs interact and workflow automatically to secure and capture evidence that is connected to our current Report Management System
- Automatic tagging of evidence and reports to streamline data collection
- Automatic triggering of body cams from a variety of sources
    - Other nearby activated cameras
    - Other nearby squad car cameras
    - unholstered weapons (gun or taser)
- Training

Future Proof Technology

- Use of Force Training

- Virtual Reality Training and Scenarios that emphasizes de-escalation and dealing with dealing with individuals suffering from mental health issues

- OSP7+ offers upgrades to newest technology as it comes available

- All software systems to include crucial evidence management and redaction is web-based and is upgraded as it is available

- We will go from multiple evidence systems to one!

Cost-Savings Using OSP 7+ Bundle

- 75% Reduction in Supervisor Admin Time for review and compliance checks using the automated and randomized performance program

- Automatic Redaction software alleviates numerous work hours if done manually

- We can bundle taser and body worn cameras in one replacement and maintenance cycle that reduces these costs if done separately. This also includes replacement cartridges and training supplies for taser and replacement of damaged units, no questions asked.

- Savings of $84/month per officer by purchasing OSP7+ over current practice of buying and maintaining services on a year to year individual basis

Community and Interagency Sharing and Cooperation

- Integrate all of these into one platform and simply share via link with other agencies, prosecutor's office, or public
  - In-Car Camera Video
  - Photographs
  - Body Camera Video
  - 911 Audio
  - Interview Video
  - Drone Video
  - Citizen Provided Evidence of Video, Photographs, or Audio

- Axon Citizen
  - Officer sends text to citizen with a link so citizen can securely upload media directly to Axon Evidence
  - Detective or PIO opens public portal requesting help or leads via social media and community members submit media to agency

- All media is sharable by a secured link that can be managed by the agency to numerous sources.
  - This eliminates the costly and very time-consuming process of downloading media to CD or USB.
  - This process currently can take a day to download and place onto device to fulfill requests.
