

MAILBOX REPAIRS

It has been the town's practice to replace mailboxes at the curb that are damaged when streets are being plowed. The snowplow does not hit the mailboxes 99 percent of the time, the snow that is being thrown off of the snowplow can damage the mailbox. Many mailboxes that are damaged when plowing, were in disrepair before the snow season. This Fall town crews will be out before the snow season and inspect mailboxes. Any mailbox that is in poor condition will be noted and the resident will be notified by mail that they need to make repairs to their mailbox. The Town of Munster will not be responsible for repairs of mailboxes if repairs are not made.
