Re: Activity participant code of conduct policy

Background:

There has been a recurring issue in one of the regular recreational activities that continues to escalate between individual participants. The issue has taken up a lot of staff time over the last two years in trying to resolve the situation amicably but without the desired results. Due to the situation, the staff has drafted an 'activity participant code of conduct policy' for your consideration.

Recommendation:

Staff recommends the approval of the attached 'activity participant code of conduct policy' that can be referred to when necessary to achieve the desired outcomes for all participants.
