About NWI PARKnership

This interactive map is the result of collaborative efforts from these steering committee members, One Region, and ideas from Northwest Indiana parks departments to enhance coordinated experiences based on the notion that people don't experience life in silos. We all cross artificial boundaries to live a rich quality of life throughout Northwest Indiana.

This creative vision, along with the analytical minds of PNW professor, Scott Schaller, and his student, David Duesing, developed this first prototype to coordinate user experience for our region. We hope this will be the first of many more advanced methods of a unified vision to benefit our residents and guests.
